Subject Index of Volume 159

Alloys
  dynamic recrystallization of Nb_3Al produced from alloy powder, 173
  environment-induced cracking of two nickel base amorphous alloys in acidic chloride solutions, 87
  mechanical properties of the order–disorder alloy system $Pd_{1-x}Mn_x$ ($x = 0.1–0.2$), L9
  non-destructive depth profiling of laser processed Zr–2.5Nb alloy by infrared photothermal radiometry, 111
  the effect of heat treatment and Nb content on the room temperature tensile properties and microstructure of Ti_3Al–Nb alloys, 73
  the influence of specimen geometry on the Portevin–Le Chatelier effect in an Al–Mg alloy, 159
  very high strain rate superplasticity in mechanically alloyed IN9052 aluminium alloy, L1
Aluminium
  dynamic recrystallization of Nb_3Al produced from alloy powder, 173
  effect of cold rolling on the tensile properties of $(Al_2O_3)p$/Al composites, 43
  hydrogen effects in (Al–Ti)–SiC particle metal matrix composites, 237
  intermetallic phases in cold welded Al–Cu joints, 231
  synthesis of iron aluminide matrix *in situ* composites from elemental powders by reactive low pressure plasma spraying, 253
  the effect of heat treatment and Nb content on the room temperature tensile properties and microstructure of Ti_3Al–Nb alloys, 73
  the influence of specimen geometry on the Portevin–Le Chatelier effect in an Al–Mg alloy, 159
  very high strain rate superplasticity in mechanically alloyed IN9052 aluminium alloy, L1
  wettability and interfacial reaction products in the AlSiMg—surface oxidized SiC system, 119
Amorphous alloys
  environment-induced cracking of two nickel base amorphous alloys in acidic chloride solutions, 87
Aqueous solutions
  corrosion fatigue crack growth of steels in aqueous solutions
    I: Experimental results and modeling the effects of frequency and temperature, 205
  corrosion fatigue crack growth of steels in aqueous solutions
    II: Modeling the effects of ΔK, 223
Austenite
  improvement of the strength of a metastable austenitic stainless steel by cyclic deformation-induced martensitic transformation at 103 K, 35

Bond strength
  comments on the bond strength measurements of Gupta and co-workers, 135
Boron
  characterization of rapidly solidified ultrahigh boron steels, 103
  investigation of chemical reactions in TiB_2/Si_3N_4 composite, 127
  the influence of Cu, Nb and Ta additions on crystallization of Fe–Si–B-based glasses, 95
Boundary nodes
  microscopic observation of suppression of grain boundary sliding by boundary nodes and steps, 193

Calzirtite
  precipitation and solidification of calzirtite in liquid phase sintered ZrO_2 (10.8 mol.% CaO) with TiO_2 additions, 267
Carbon
  hydrogen effects in (Al–Ti)–SiC particle metal matrix composites, 237
  wettability and interfacial reaction products in the AlSiMg—surface oxidized SiC system, 119
Charpy V notch
  prediction of weld metal Charpy V notch toughness, 187
Chloride
  environment-induced cracking of two Ni base amorphous alloys in acidic chloride solutions, 87
Cold rolling
  effect of cold rolling on the tensile properties of $(Al_2O_3)_p$/Al composites, 43
Cold welding
  intermetallic phases in cold welded Al–Cu joints, 231
Composites
  considerations in the use of yield asymmetries for the analysis of internal stresses in MMCs, 51
  effect of cold rolling on the tensile properties of $(Al_2O_3)_p$/Al composites, 43
  interfacial debonding and fiber pull-out stresses of fiber-reinforced composites
    VIII: the energy-based debonding criterion, 65
  investigation of chemical reactions in TiB_2/Si_3N_4 composite, 127
  synthesis of iron aluminide matrix *in situ* composites from elemental powders by reactive low pressure plasma spraying, 253
Copper
  intermetallic phases in cold welded Al–Cu joints, 231
  the influence of Cu, Nb and Ta additions on crystallization of Fe–Si–B-based glasses, 95
Corrosion
  corrosion fatigue crack growth of steels in aqueous solutions
    I: Experimental results and modeling the effects of frequency and temperature, 205
  corrosion fatigue crack growth of steels in aqueous solutions
    II: Modeling the effects of ΔK, 223

Crack growth
corrosion fatigue crack growth of steels in aqueous solutions I: Experimental results and modeling the effects of frequency and temperature, 205
corrosion fatigue crack growth of steels in aqueous solutions II: Modeling the effects of ΔK, 223
Cracking
environment-induced cracking of two Ni base amorphous alloys in acidic chloride solutions, 87
Creep
prediction of creep parameters of type 316 stainless steel under service conditions using the θ-projection concept, 199
Cyclic deformation
improvement of the strength of a metastable austenitic stainless steel by cyclic deformation-induced martensitic transformation at 103 K, 35
Cyclic loading
dislocation arrangements in α-iron loaded cyclically in a constant magnetic field, 167

Debonding
interfacial debonding and fiber pull-out stresses of fiber-reinforced composites VIII: the energy-based debonding criterion, 65
Depth profiling
non-destructive depth profiling of laser processed Zr–2.5Nb alloy by infrared photothermal radiometry, 111
Dislocation
dislocation arrangements in α-iron loaded cyclically in a constant magnetic field, 167
Dislocation glide
dislocation glide and multiple slip, 143

Fatigue
corrosion fatigue crack growth of steels in aqueous solutions I: Experimental results and modeling the effects of frequency and temperature, 205
corrosion fatigue crack growth of steels in aqueous solutions II: Modeling the effects of ΔK, 223
Fibre reinforcement
interfacial debonding and fiber pull-out stresses of fiber-reinforced composites VIII: the energy-based debonding criterion, 65

Glasses
the influence of Cu, Nb and Ta additions on crystallization of Fe–Si–B-based glasses, 95
Grain boundary sliding
microscopic observation of suppression of grain boundary sliding by boundary nodes and steps, 193

Heat treatment
the effect of heat treatment and Nb content on the room temperature tensile properties and microstructure of Ti_3Al–Nb alloys, 73
Hydrogen
hydrogen effects in (Al–Ti)–SiC particle metal matrix composites, 237

Interfaces
interfacial debonding and fiber pull-out stresses of fiber-reinforced composites VIII: the energy-based debonding criterion, 65
prediction of matrix-particle interfacial separation in particle-strengthened materials, 151
wettability and interfacial reaction products in the AlSiMg–surface oxidized SiC system, 119
Intermetallics
intermetallic phases in cold welded Al–Cu joints, 231
summary report: computational issues in the mechanical behavior of metals and intermetallics, 1
Iron
dislocation arrangements in α-iron loaded cyclically in a constant magnetic field, 167
synthesis of iron aluminide matrix *in situ* composites from elemental powders by reactive low pressure plasma spraying, 253
the influence of Cu, Nb and Ta additions on crystallization of Fe–Si–B-based glasses, 95

Laser processing
non-destructive depth profiling of laser processed Zr–2.5Nb alloy by infrared photothermal radiometry, 111

Magnesium
the influence of specimen geometry on the Portevin–Le Chatelier effect in an Al–Mg alloy, 159
wettability and interfacial reaction products in the AlSiMg–surface oxidized SiC system, 119
Magnetic field
dislocation arrangements in α-iron loaded cyclically in a constant magnetic field, 167
Manganese
mechanical properties of the order–disorder alloy system $Pd_{1-x}Mn_x$ ($x = 0.1$–0.2), L9
Maraging steel
machine-induced phase transformation in a maraging steel, 261
Martensite
improvement of the strength of a metastable austenitic stainless steel by cyclic deformation-induced martensitic transformation at 103 K, 35
Matrix separation
prediction of matrix–particle interfacial separation in particle-strengthened materials, 151
Mechanical alloying
very high strain rate superplasticity in mechanically alloyed IN9052 aluminium alloy, L1
Melt spinning
rapid solidification characteristics in melt spinning, 243
Metal matrix composites
considerations in the use of yield asymmetries for the analysis of internal stresses in MMCs, 51
hydrogen effects in (Al–Ti)–SiC particle metal matrix composites, 237
residual stresses in discontinuous metal matrix composites, L13
Metals
summary report: computational issues in the mechanical behavior of metals and intermetallics, 1
Multiple slips
dislocation glide and multiple slip, 143

Nickel
environment-induced cracking of two Ni base amorphous alloys in acidic chloride solutions, 87
on the evaluation of the reactive stress in TiNi shape memory alloys, L5

Niobium
dynamic recrystallization of Nb_3Al produced from alloy powder, 173
non-destructive depth profiling of laser processed Zr–2.5Nb alloy by infrared photothermal radiometry, 111
stress reduction tests on Nb–1wt.%Zr at 1300 K, 181
the effect of heat treatment and Nb content on the room temperature tensile properties and microstructure of Ti_3Al–Nb alloys, 73
Nitrogen
investigation of chemical reactions in TiB_2/Si_3N_4 composite, 127
Notch toughness
prediction of weld metal Charpy V notch toughness, 187

Oxygen
effect of cold rolling on the tensile properties of $(Al_2O_3)_p/Al$ composites, 43
precipitation and solidification of calzirtite in liquid phase sintered ZrO_2 (10.8 mol.% CaO) with TiO_2 additions, 267

Palladium
mechanical properties of the order–disorder alloy system $Pd_{1-x}Mn_x$ ($x = 0.1$–0.2), L9
Particle separation
prediction of matrix–particle interfacial separation in particle-strengthened materials, 151
Particle strength
prediction of matrix–particle interfacial separation in particle-strengthened materials, 151
Phase transformations
machine-induced phase transformation in a maraging steel, 261
Photothermal radiometry
non-destructive depth profiling of laser processed Zr–2.5Nb alloy by infrared photothermal radiometry, 111
Plasma spraying
synthesis of iron aluminide matrix *in situ* composites from elemental powders by reactive low pressure plasma spraying, 253
Powders
dynamic recrystallization of Nb_3Al produced from alloy powder, 173
Precipitation
precipitation and solidification of calzirtite in liquid phase sintered ZrO_2 (10.8 mol.% CaO) with TiO_2 additions, 267

Rapid solidification
characterization of rapidly solidified ultrahigh boron steels, 103
rapid solidification characteristics in melt spinning, 243
Recrystallization
dynamic recrystallization of Nb_3Al produced from alloy powder, 173

Shape memory alloys
on the evaluation of the reactive stress in TiNi shape memory alloys, L5
Silicon
hydrogen effects in (Al–Ti)–SiC particle metal matrix composites, 237
investigation of chemical rections in TiB_2/Si_3N_4 composite, 127
the influence of Cu, Nb and Ta additions on crystallization of Fe–Si–B-based glasses, 95
wettability and interfacial reaction products in the AlSiMg–surface oxidized SiC system, 119
Solidification
precipitation and solidification of calzirtite in liquid phase sintered ZrO_2 (10.8 mol.% CaO) with TiO_2 additions, 267
Stainless steel
improvement of the strength of a metastable austenitic stainless steel by cyclic deformation-induced martensitic transformation at 103 K, 35
prediction of creep parameters of type 316 stainless steel under service conditions using the θ-projection concept, 199
Steel
corrosion fatigue crack growth of steels in aqueous solutions I: Experimental results and modeling the effects of frequency and temperature, 205
corrosion fatigue crack growth of steels in aqueous solutions II: Modeling the effects of ΔK, 223
Steels
characterization of rapidly solidified ultrahigh boron steels, 103
Strain rate
very high strain rate superplasticity in mechanically alloyed IN9052 aluminium alloy, L1
Stress
consideration in the use of yield asymmetries for the analysis of internal stresses in MMCs, 51
interfacial debonding and fiber pull-out stresses of fiber-reinforced composites VIII: the energy-based debonding criterion, 65
on the evaluation of the reactive stress in TiNi shape memory alloys, L5
residual stresses in discontinuous metal matrix composites, L13
stress reduction tests on Nb–1wt.%Zr at 1300 K, 181
Superplasticity
very high strain rate superplasticity in mechanically alloyed IN9052 aluminium alloy, L1

Tantalum
the influence of Cu, Nb and Ta additions on crystallization of Fe–Si–B-based glasses, 95
Tensile properties
the effect of heat treatment and Nb content on the room temperature tensile properties and microstructure of Ti_3Al–Nb alloys, 73
Tensiles
effect of cold rolling on the tensile properties of $(Al_2O_3)_p/Al$ composites, 43
θ-projection concept
prediction of creep parameters of type 316 stainless steel under service conditions using the θ-projection concept, 199
Titanium
hydrogen effects in (Al–Ti)–SiC particle metal matrix composites, 237
investigation of chemical reactions in TiB_2/Si_3N_4 composite, 127
on the evaluation of the reactive stress in TiNi shape memory alloys, L5
precipitation and solidification of calzirtite in liquid phase sintered ZrO_2 (10.8 mol.% CaO) with TiO_2 additions, 267
the effect of heat treatment and Nb content on the room temperature tensile properties and microstructure of Ti_3Al–Nb alloys, 73

Type 316 stainless steel
prediction of creep parameters of type 316 stainless steel under service conditions using the θ-projection concept, 199

Weld metals
prediction of weld metal Charpy V notch toughness, 187
Wettability
wettability and interfacial reaction products in the AlSiMg–surface oxidized SiC system, 119

Yield asymmetries
considerations in the use of yield asymmetries for the analysis of internal stresses in MMCs, 51

Zirconium
non-destructive depth profiling of laser processed Zr–2.5Nb alloy by infrared photothermal radiometry, 111
precipitation and solidification of calzirtite in liquid phase sintered ZrO_2 (10.8 mol.% CaO) with TiO_2 additions, 267
stress reduction tests on Nb–1wt.%Zr at 1300 K, 181
